Wall Fan

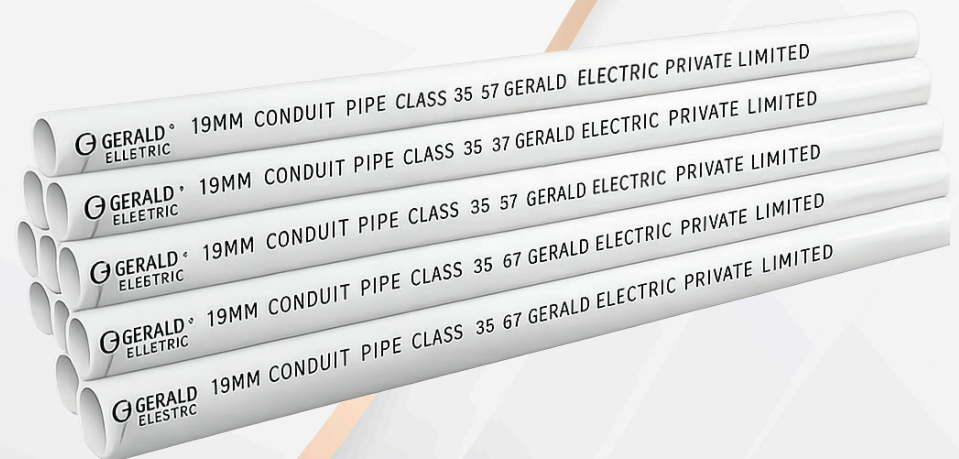

Exhaust Fan

- High air delivery for effective cooling
- Smooth and stable motor performance
- Energy-efficient operation
- Stylish and durable design

Conduit Pipes

- Gerald Electric Conduit Pipes are manufactured using high-quality PVC material to ensure smooth wiring and dependable structural strength.
- Available in 19mm and 25mm sizes, both in 3-meter lengths.

- High strength and crack-resistant construction
- Smooth internal surface for easy cable routing
- Lightweight and easy to install
- Long-lasting performance in diverse environments

Metal Enclosures

- Gerald Electric Metal Boxes and Distribution Boards are engineered with heavy-duty 18-gauge GI and precision finishing, ensuring durability, safety, and secure electrical installations.
- Designed for reliable performance in both residential and commercial environments, they are available in a wide range of configurations—from 1M to 16M metal boxes and SPN double-door distribution boards (2 to 16 way)—all featuring robust, powder-coated metal construction for long-lasting use and organized power distribution.

- *High safety standards for circuit protection*
- *Strong and durable build quality*
- *Rust-resistant coating for long service life*
- *Suitable for residential and commercial wiring systems*

House Wiring

- Gerald Electric manufactures advanced fire-retardant copper flexible wires designed specifically for residential applications.

- *Flame Retardant with high oxygen index*
- *Lead-free, eco-friendly insulation*
- *99.97% high-purity electrolytic copper*
- *High conductivity with superior power transfer*
